

DSA MARATHON

Day 1 (Monday) — Practice Questions with Answers

Part A — MCQs with Answers

Q1. Entry point?	Answer: <code>main()</code>
Q2. Header for cin/cout?	Answer: <code><iostream></code>
Q3. Input operator?	Answer: <code>>></code>
Q4. Integer keyword?	Answer: <code>int</code>
Q5. <code>x=5; x++;</code>	Answer: <code>6</code>
Q6. Single-line comment?	Answer: <code>//</code>
Q7. ASCII of A	Answer: <code>65</code>
Q8. <code>5/2 (int)</code>	Answer: <code>2</code>
Q9. <code>2+3*4</code>	Answer: <code>14</code>
Q10. Preferred cast	Answer: <code>static_cast<double>()</code>

Part B — Coding Questions

Q1. Print Hello

```
#include <iostream>
using namespace std;
int main(){ cout<<"Hello"; }
```

Q2. Input and print integer

```
int x; cin>>x; cout<<x;
```

Q3. Sum of two numbers

```
int a,b; cin>>a>>b; cout<<a+b;
```

Q4. Print name and age

```
string name; getline(cin,name);
int age; cin>>age;
cout<<name<<" "<<age;
```

Q5. Increment

```
int x=10; x++; cout<<x;
```

Q6. Decrement

```
int x=10; x--; cout<<x;
```

Q7. Remainder

```
int a,b; cin>>a>>b; cout<<a%b;
```

Q8. ASCII value

```
char ch; cin>>ch;
cout<<static_cast<int>(ch);
```

Q9. Typecasting

```
int x; cin>>x;
double ans=static_cast<double>(x)/2;
cout<<ans;
```

Q10. Operator precedence

```
cout<<5+6/2*3-4; // Output: 10
```
