Loops Practice Set 2 — Medium+ Level

Coding Problems (Questions Only) — Difficulty is higher than the previous practice set.

1. Armstrong Numbers in a Range

Write a C++ program that takes two integers L and R as input and prints all Armstrong numbers between L and R (inclusive). Do not use any built-in power function.

2. Hollow Number Pyramid

Given an integer N, print a hollow number pyramid using nested loops. Only the border of the pyramid should contain numbers.

3. GCD and LCM

Write a C++ program to find the GCD and LCM of two integers using loops only. Do not use recursion or library functions.

4. Decimal to Binary

Write a C++ program to convert a decimal number into its binary representation using loops only. Do not use bitset or any built-in conversion.

5. Perfect Numbers in a Range

Write a C++ program to print all Perfect Numbers between L and R and also print the total count of Perfect Numbers found.
